To the FDA:

RE: Docket No. 98N-1038

I am sorry that we have to introduce irradiated foods into the American or world-wide food market to begin with. But I absolutely demand that the radura symbol be used to identify those products that have been irradiated. I will not be purchasing those products and I want to know what I am buying. I do not want alternative terms such as "cold pasteurization" or "electronic pasteurization" used to cloud the facts.

Thank you for including my opinion in your public survey!

Sincerely,

Laura Martin
